#### Retro Wheels

Name	Height	Durometers	Width	Contact Patch	Hub	Hub Setting	Depth of Urethane (mm)	Edges	Disciplines	How They've Been Described by Our Customers
BertZ	60mm	81a	35mm	32.0mm	25mm	SS Sideset	17.5	Square	General purpose fun wheel used with a number of the smaller Retro boards for quick turns and cruising	Blast from the past
InvertZ	61mm	99a	39mm	24.0mm	35mm	OS Inverted Offset	13	Round	Pool, Park, Pipe. Excellent slide wheel.	Our <b>Classic Park</b> formula slides the most when mounted sideset, and hooks up sooner when inverted. Our <b>Park Plus</b> formula will behave similarly, but definitely has more traction, lasts longer, and resists flat-spotting better than anything else we've ever tried.
SkwertZ	62mm	96a	40mm	27.0mm	25mm	CS Centerset	18.5	Round	Retro 80's Style Pool, Park, Pipe ; Excellent slide wheel	One of the most versatile ditch, park and slide wheels made. Smooth transitions for all of the more aggressive, core activities
VertZ	65mm	96a	41mm	27.0mm	25mm	SS Sideset	20	Round	Retro 70's Style Pool, Park, Pipe ; Excellent slide wheel	Amazing wheel for concrete or coping.
ZigZags	66mm	78a, 80a, 83a, 86a, 89a	51mm	48.5mm	25mm	OS Offset	20.5	Square	The quicker smaller hard-carving, pumping and slalom specific wheel. 78a for carver-cruisers. "Reflex" formulas for Slalom racing.	Finally the perfect sized Tight Slalom wheel and a cool wheel for my Old School decks. Easy to pump up to speed. Insane traction
ZigZags	70mm	78a, 77a, 80a, 83a, 86a, 89a	53mm	51.5mm	25mm	OS Offset	22.5	Square	The faster larger hard-carving, pumping and slalom specific wheel. 78a for carver-cruisers. "Reflex" formulas are hitting the Slalom, Downhill, and Street Luge racing	The traction of a Grippin in an offset footprint. Excellent acceleration when pumping and awesome roll speed in GS. The urethane even sounds fast
BigZigs	75mm	77a, 80a, 83a	58mm	56mm	25mm	OS Offset	25	Square	The faster larger hard-carving, pumping and slalom specific wheel. 78a for carver-cruisers. "Reflex" formulas are hitting the Slalom, Downhill, and Street Luge racing	The traction of a Grippin in an offset footprint. Excellent acceleration when pumping and awesome roll speed in GS. The urethane even sounds fast

#### Pink Wheels

Name	Height	Durometers	Width	Contact Patch	Hub	Hub Setting	Depth of Urethane (mm)	Edges	Disciplines	How They've Been Described by Our Customers
P52's	52mm	96a	32mm	17.0mm	25mm	CS Centerset	13.5	Round	Street wheel with a wider contact patch for more traction and control	Killer street wheel
Polkadots	62mm	78a, 96a	40mm	27.0mm	25mm	CS Centerset	18.5	Round	Soft formulas - excellent multi-purpose longboard wheel on all terrains. Hard formulas - excellent pool, park, pipe and ditch wheel as well as slide wheel	One of the most versatile longboard wheels made. Hard formulas are another versatile wheel for more aggressive, core activities
SickSicks	66mm	78a	51mm	48.5mm	25mm	OS Offset	20.5	Square	The quicker smaller hard-carving, pumping and slalom specific wheel. One of Pink's first high-traction wheels.	Quicker turns and more my size compared to other brands wheels. Incredible traction, perfect mini carver.
Seven-O's	70mm	78a	53mm	51.5m	25mm	OS Offset	22.5	Square	The faster larger hard-carving, pumping and slalom specific wheel. One of Pink's first high-traction wheels.	Deeper carves and faster turns than any of Pink's wheels. I can't slide them out. Great for Hybrid and GS.
Powerballs	72mm	78a	45mm	32.0mm	35mm	OS Offset	18.5	Round	Pink's largest wheel - carving, cruising, downhill, and bigger longboards	Fast, smooth, comfortable grippy wheel
